PROFESSIONAL SUMMARY

Product and business analysis professional with hands-on experience as a Product Manager and Business Analyst Intern. Skilled in requirements gathering (BRDs, FRDs, user stories), UAT, API testing, SQL data validation and stakeholder coordination. B.Tech graduate (CGPA 8.42) in Data Science and Cloud Computing, seeking Business Analyst, Project Management and Product Management roles.

WORK EXPERIENCE

Product Manager | mple.ai (On-site) **Aug 2026 – Present**

- Work with clients and stakeholders to understand business challenges, pain points and product requirements.
- Partner with technical teams to assess solutions and constraints and define actionable product improvements.
- Turn client feedback into new features and enhancements, aligning on feasibility, priority and value.
- Run daily stand-ups, sprint discussions and stakeholder meetings to track progress and resolve blockers.

Business Analyst Intern | Benchmark Computer Solutions Limited (On-site) **Jan 2026 – Apr 2026**

- Documented business requirements through BRDs, FRDs and user stories.
- Worked on key modules: GC Requisitions, Connect, Work Orders, Bill Orders and DPR.
- Coordinated with Product, Development and QA teams to deliver features.
- Conducted UAT, API testing and SQL-based data validation to ensure functional accuracy.

Visual Content Creator | Mercor (Remote) **Aug 2025 – Jan 2026**

- Created and optimized visual content for AI model training and data generation.
- Performed image editing and quality checks while managing multiple deliverables to deadline.

PROJECTS

eFORCE | Construction & Workforce Management Platform

- Translated business requirements into functional specifications and user stories.
- Covered modules including GC Requisitions, Connect, Work Orders, Bill Orders and Daily Progress Reports (DPR).
- Created process workflows, API documentation and database field mappings.
- Collaborated with developers and performed functional, API and UAT testing.

Bank Churn Predictor | Python, Machine Learning

- Analyzed customer data to uncover churn patterns and key business risk factors.
- Built predictive models in Python to identify customers likely to leave, using data preprocessing and feature engineering.
- Generated insights to support customer retention strategy and decision-making.
