Tanish Patil

+91 9136321809 | tanishpatil2500@gmail.com | LinkedIn | Ghansoli, Navi Mumbai

Engineering graduate with experience in design, software development, and cross functional collaboration. Skilled in problem solving, research, stakeholder coordination, and delivering user focused solutions. Seeking entry level opportunities to contribute analytical thinking, adaptability, and creativity in a growth oriented environment.

WORK EXPERIENCE

Benchmark Computer Solutions Limited On-site
Business Analyst Intern Jan 2026 – April 2026

- Gathered, analyzed, and documented business requirements using structured formats such as BRDs and user stories.
- Modified database records using SQL to test application workflows and ensure proper system functionality.
- Collaborated with cross functional teams to identify process gaps and recommend workflow improvements.
- Assisted in UAT testing to validate system functionality and ensure alignment with business requirements.
- Communicated findings and requirements effectively with stakeholders and development teams.

Mercor Remote
Visual Content Creator Aug 2025 – Jan 2026

- Created and optimized visual content to support AI model training and data generation.
- Performed image editing and quality assurance to ensure datasets met accuracy and consistency standards.
- Collaborated with cross-functional teams to incorporate feedback and maintain project quality.
- Managed multiple deliverables while adhering to project guidelines and consistently meeting deadlines.

PROJECTS

PSY-VOICE:AI-ML Powered Mental Health Care, Secured By Blockchain

- Developed an AI driven mental healthcare system using NLP and machine learning techniques.
- Built features like emotion detection, chatbot interaction, and user engagement tracking.
- Analyzed user interaction data to improve system accuracy and experience.
- Collaborated on system design, scalability, and secure data handling using blockchain concepts.

Bank Churn Predictor

- Analyzed customer data to identify churn patterns and key business risk factors.
- Built predictive models using Python to identify customers likely to leave the bank.
- Performed data preprocessing and feature engineering to improve model performance.
- Generated insights to support customer retention strategies and business decision-making.

SKILLS

Product/Project Skills: Product documentation, Requirement gathering, User research, Project planning, Agile & Scrum, Task management, Communication & stakeholder management.

Data Analysis: Python

Tools & Technologies: SQL,AWS,Figma, Notion, Jira, PowerPoint, Photoshop

Soft Skills: Communication, Leadership, Problem-solving, Critical thinking, Time management, Adaptability, Decision-making.

EDUCATION

Pillai College of Engineering Panvel, Navi Mumbai
B.Tech in Electronics & Computer Science | CGPA 8.42 2022 – 2026
Specialization: Data Science and Cloud Computing
Award: Best Student Award (2026)

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Graphics Head- Alegria 2025, PCE Students' Council 2024–25: Led and coordinated the graphics team, managed workloads, and ensured smooth execution of creative projects while delivering impactful event designs.
